Hiring Manager
Goldman Sachs
Bengaluru, Karnataka, India

Dear Hiring Manager,

I am writing to express my keen interest in the Summer Analyst position with Goldman Sachs' Corporate Planning Management division. As a 3rd year Information Technology student at Keshav Memorial Institute of Technology, with hands-on experience in machine learning, deep learning, and AI-based solutions, I am confident in my ability to contribute effectively to your team.

Goldman Sachs' commitment to fostering innovation and driving operational efficiency resonates with my passion for creating technology solutions that solve complex real-world problems. I am drawn to the opportunity to work on data-driven decision-making processes that drive strategic outcomes across a global scale, and I believe my background in AI and data science will enable me to bring fresh perspectives to the challenges you are tackling.

Through my academic projects and internship experience, I have honed the ability to solve problems using a combination of technical skills and strategic thinking. For instance, I am currently developing an AI-powered accessibility platform tailored to neurodivergent users, where I have integrated machine learning models with real-time data processing for adaptive UI features. This experience has refined my skills in data analysis, project management, and cross-functional collaboration – all of which are crucial in the context of corporate planning and expense management.

What excites me most about the Summer Analyst role at Goldman Sachs is the opportunity to work on business analytics and strategic planning with a firm that constantly innovates in the financial sector. My experience with developing AI-driven systems, such as a drone-based emergency response platform, has instilled a strong focus on operational efficiency, cost-effectiveness, and scalability – skills that are highly transferable to the work done at Goldman Sachs. I am eager to bring these skills to your team, contributing to data analytics initiatives that drive business growth and financial decision-making.

I look forward to the opportunity to contribute to Goldman Sachs' success while learning from its industry leaders. Thank you for considering my application. I would be thrilled to further discuss how my technical skills and problem-solving mindset can add value to your Corporate Planning Management division.

Sincerely,
Ananya Sirandass
